1. Intended as an inclusive and flexible class to get new entrants into On-Road Racing
2. Common platforms include, but are not limited to Tamiya TT-02, Traxxas 4-Tec, Kyosho Fazer, HPI RS4, etc.
3. Typically, these cars come with a brushed Motor and ESC, all of which would be acceptable. Upgrades would be limited to 3300kv Brushless, 25.5T Brushless, or any locked timing 21.5T Brushless motor.
4. Any wheel and tire combo are accepted so long as it is Touring Car based.
5. Gearing is wide open
6. Body must be a realistic looking touring car / on-road body – no space ships on wheels.
7. Servo is wide open
8. Differential oil/grease can be changed
9. Shock oil can be changed
